Bilateral posterior scleritis presenting as acute primary angle closure: A case report

Wen C *et al.* Bilateral posterior scleritis misdiagnosis as PACG

Chao Wen, Hui Duan

Abstract

BACKGROUND

Scleritis is a rare disease and the incidence of bilateral posterior scleritis is even rarer. Unfortunately, misdiagnosis of the latter is common due to its insidious onset, atypical symptoms and varied manifestations. We report here ¹³ a case of bilateral posterior

https://www.researchgate.net/publication/221968513...

To **report** a **case of posterior scleritis** associated with **angle closure** glaucoma and transient myopia. A previously healthy 29-year-old male was referred for ...

Bilateral acute angle closure glaucoma as an initial presentation ...

https://journals.sagepub.com/doi/abs/10.1177/1120672120951442

Bilateral acute angle closure glaucoma (AACG) can be a rare initial manifestation of VKH that may be misdiagnosed as **primary angle closure glaucoma (PACG)**. Case report: A 62-year-old woman with bilateral painless loss of vision referred to Qingdao Municipal Hospital.

Scleritis: When a Red Eye Raises a Red Flag

https://www.reviewofoptometry.com/article/... ▾

Jul 15, 2014 · **Posterior scleritis** with ciliary body inflammation can initiate ciliary body rotation, which causes an anterior displacement of the lens iris diaphragm resulting in secondary **angle closure**. 5 Additionally, ciliary body edema relaxes the lens zonules, which causes thickening of the crystalline lens and a myopic shift, as in this patient. 6
