

Dear Lian-Sheng Ma, Science Editor, Company Editor-in-Chief, Editorial Office,

I am very honored to hear that my efforts are appreciated. I read the comments of the Editorial Office and peer review carefully. According to the comments of the reviewer, I revise the manuscript.

Reply to Reviewer 1:

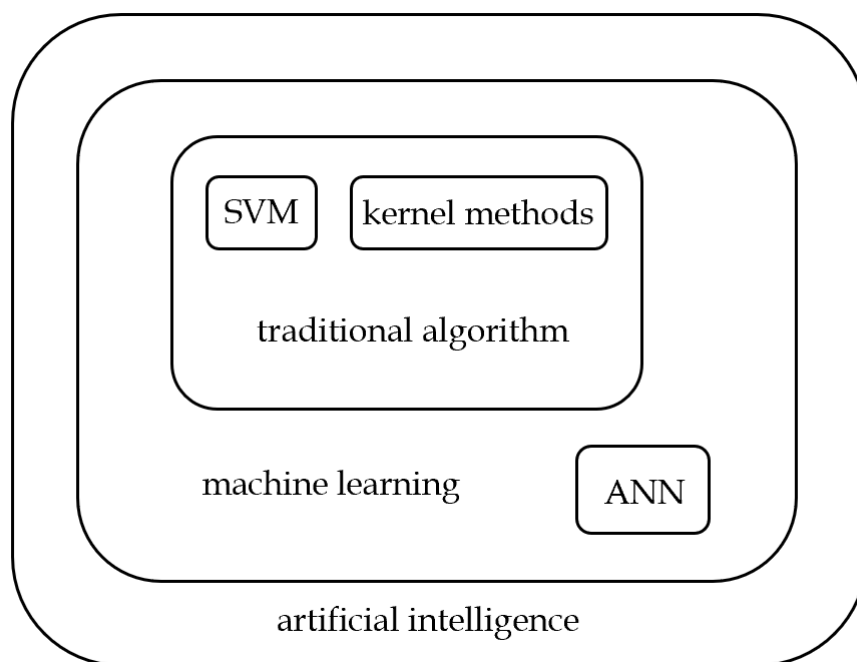

Thank you for your review. I really appreciate your recognition of my work.

**Discussion of the retrospective analysis of MRI data cohorts and the outcomes of the patients, if available, may reinforce the value of the review.**

We add discussions to some important retrospective studies in the manuscript. We find the supplementary discussions reinforce the value of the review. In view of minireview, I probably might not have enough space in this minireview to discuss all of the MRI data cohorts. Again, I would like to express my warm thanks to you! Please accept my gratitude.

Reply to Reviewer 2:

Thank you for your recognition of my work. Thank you for your review. I have revised the figure 1. Figure 1 shows the relationship between artificial neural networks and support vector machines in artificial intelligence.

Reply to the editor:

Firstly, I provide the original figure documents. I prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by you. Secondly, I also add the PMID and DOI in the reference list. Besides, I revise the content and format for the manuscript according to the guidelines. Finally, I modify the format of reference and complete Copyright License Agreement Form and ICMJE Form for Disclosure of Potential Conflicts of Interest.

Best regards,

Bin Wu, Pei-Pei Wang, Chao-Lin Deng
