

Responses to the Reviewer's Comments and Editorial Office's comments

Reviewer #1:

The authors present a novel approach for the treatment of an uncommon type of fracture. The article is written in a concise and informative manner. The cases reported are well-described, with good quality pictures of the imaging studies and the patients. The description of the surgical technique is adequately detailed.

Thanks for your encouraging comments.

Writing in the english language requires minor corrections.

We have had a native-English speaker edit the manuscript for grammar, sentence structure, word usage, spelling, capitalization, punctuation, format, and general readability.

Editorial Office's comments and suggestions:

The authors need to provide the signed Conflict-of-Interest Disclosure Form and Copyright License Agreement.

We have provided the signed Conflict-of-Interest Disclosure Form and Copyright License Agreement.

The authors did not provide the approved grant application form(s).

We fail to provide the approved grant application form(s), and we agree to delete the supportive foundations.

The authors did not provide original pictures.

We have provided decomposable Figures, organized them into a single PowerPoint file, and submitted as "62564-Figures.ppt" on the system.
