citeseerx.ist.psu.edu/viewdoc/summary?doi=10.1.1.566.9547 ▾

We present a 27-year-old man who had an acute anterior myocardial infarction during the second course of chemotherapy for seminoma. CASE REPORT A 27-year-old man was admitted to the emergency unit with sudden onset of chest pain. Testicular can-cer, seminoma, was diagnosed 2 months previously, and surgical resection of the testis was performed.
