SPECIFIC COMMENTS TO AUTHORS

This editorial is adequate. Just a pair of comments for considering: - "Compared with the number of published articles in 2019 (14 total), the number of published articles was higher by 23 in 2020 (37/14), equating to a 264.29% increase." It could be (37 vs 14) or (14==>37) - (1) "The Editorial Board members submitted few manuscripts, and this number needs to increase in 2021." This is an exposition of an internal conflict. Please consider if is a right strategy to invite your editorial board members to publish on WJT, or edit it.

SPECIFIC COMMENTS TO AUTHORS

This Editorial describes in much detail the accomplishments, bibliometrics and expectations for future advances of the WJT on the occasion of the 10. anniversary of the foundation of the journal. What might be added is the description of the journal's Impact Factor (IF) and its progress over time and a comparison of the IF with other leading journals indexed in subspecialties of solid organ transplantation and surgery. The major manuscript type published in this journal are reviews and minireviews in about two thirds (63% and 6%). The attractiveness of the WJT should be enhanced for original clinical research. Table 2 mentioned in the text could not be found; this needs attention.
