Dear Editor,

Thank you for the opportunity to revise our manuscript “Cutaneous myiasis with eosinophilic pleural effusion: a rare case report” by Dr. Fan and colleagues for consideration of publication by World Journal of Clinical Cases. We appreciate the careful review and constructive suggestions. We believe that the manuscript is substantially improved after making the suggested edits.

Reviewer: The criteria from the check list are fulfilled. The main original finding is the occurrence of eosinophilic pleural effusion due to cutaneous myiasis, something extraordinary. This finding is the main importance of the manuscript and something unique. Physicians should be aware of the symptom like pleural effusion during myiasis. However more information, probably included in the manuscript, not only abstract are needed to evaluate the paper.

In this new version, we have modified the English and formatting. We also reconstruct the abstract and main text. We believe that these modifications have improved the presentation of our work! Thank you for your consideration.

Thank you for your attention and consideration. I will be happy to provide further information as requested. You may contact at (+86-18628158466 and/or wangchengwei@wchscu.cn).

Sincerely,

Chengwei Wang, MD
