Aug 01, 2016 - Although countless religions are practiced around the world, it is important to become familiar with the religious practices among the populations one serves. For example, Hispanics use praying as a spiritual intervention for their diabetes and overall health. Some people believe that diabetes is a punishment and that they cannot do much to alter their fate.

Impact of spiritual beliefs and faith-based interventions on diabetes management

Onyishi CN *et al.* Spiritual beliefs and FBIs on diabetes management

Charity Neejide Onyishi, Leonard Chidillechukwu, Vera Victor-Aigbodion, Chiedu Eseadi

Abstract

Management of diabetes constitutes significant social and economic burdens across the world. There is a shortage of empirical studies on the management of diabetes and the associated mental health issues through spiritual beliefs and faith-based interventions (FBIs). It is not also clear how spiritual beliefs and FBIs account for the effective management of diabetic conditions. This article discusses the impact of spiritual beliefs
