The Editorial Office will close and remove the peer reviewer from the F6Publishing system immediately. 2 Language evaluation: Classification: Grade A and Grade B. A language editing certificate issued by Edanz was provided. 3 Academic norms and rules: The authors provided the Biostatistics Review Certificate, the Institutional Review Board Approval Form, and the Written informed consent. No academic misconduct was found in the Bing search. 4 Supplementary comments: This is an unsolicited manuscript. The study was supported by grants from the 'Assistance Publique des Hôpitaux de Paris' and AbbVie (North Chicago, Illinois, U.S.A.). The topic has not previously been published in the WJG. 5 Issues raised: (1) The authors did not provide the approved grant application form(s). Please upload the approved grant application form(s) or funding agency copy of any approval document(s); (2) The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor; (3) PMID and DOI numbers are missing in the reference list. Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references. Please revise throughout; and (4) The "Article Highlights" section is missing.

| | Statistical symbols are accurate. Statistical significance is expressed | |
| | as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 (P > 0.05 usually does not need to be denoted). | |
| 18 | If there are other series of P values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used, | [Y] |
| | and a third series of P values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01. | |
| | Statistical data is expressed as mean \pm SD or mean \pm SE. | |
| | The 'DISCUSSION' section (1) describes the main purpose and | |
| | hypothesis of the study; (2) summarizes the most important results; | |
| | (3) illustrates and explains the results (but does not simply repeat | |
| 10 | the data) and draws conclusions or inferences based on the results; | F-47 |
| 19 | (4) points out the limitations of the study and their impact on the | [Y] |
| | results, as well as proposes further advice on future research | |
| | topic(s) or direction(s); and (5) describes the theoretical significance | |
| | and practical value of the findings. | |
| 20 | The 'ACKNOWLEDGEMENTS' section expresses gratitude to any | |
| | individuals or organizations for technical support (i.e., providing | |
| | instrumentation, equipment or experimental materials, and/or | F2/3 |
| | assistance in experimental work), non-technical services (i.e., useful | [Y] |
| | inspiration, suggestions, guidance, or review), and/or any other | |
| | auxiliary work. | |

| 21 | The 'ARTICLE HIGHLIGHTS' section provides comments for | [Y] |
|----|--|-----|
| | original articles in accordance with the specified format. | [-] |
| | The 'REFERENCES' section lists the references in the Vancouver | |
| | style. This style uses Arabic numeral in-text citations based on the | |
| | order of the first appearance of a source in the text. For citations | |
| | where the author's name is indicated in the text, a superscript | |
| | number should be placed following the name (i.e, "Pang et al"). For | |
| | citations where no author is indicated, a superscript number should | |
| 22 | be placed at the end of the sentence. Respective examples are: "Ma[1] | [Y] |
| 1 | reported", "Pan et al ^[2-5] indicated"; "PCR has a high | |
| | sensitivity[6,9]." No superscript numbers are used when the | |
| | reference number is described in the text; for example, "The | |
| | experimental method used has been described in reference [8]." The | |
| | style of reference citations in tables is the same as that in the text | |
| | (e.g., Pan et $al^{[2-5]}$, please see reference [8]). | |
| | Journal references have been verified to ensure that there are no | |
| | duplicate references and that the PMID numbers are correct. For | |
| | references not yet included in PubMed: the name of Chinese | |
| | journals is spelled out using Chinese Pinyin, with the first letter of | |
| 23 | each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of | [Y] |
| | journals in other languages are listed according to indexing | |
| | information retrieved from Google. Book references are presented | |
| | with all the information relevant to the electronic version. | |
| | The number of cited references is appropriate for the article type, as | |
| 24 | follows: | |
| | Commentary: no less than 50; | _ |
| | Review: no less than 100; | [Y] |
| | Article: no less than 30/26; | |
| | Case Report and Letter to the Editor: no less than 1. | |

| | with their appearance and presentation in the text. Symbols in | |
| | tables (e.g., +, -, \times , \div , *) correctly correspond to the definitions in the | |
| 07 | footnotes. Only one legend is provided for each multi-panel figure | F3/3 |
