Comparison Between Laparoscopic Sleeve Gastrectomy and ...<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3671102>

Over 90 million patients suffer from diabetes in China, 90 % of whom have T2DM . Morbid obesity is also linked with hypertension, obstructive sleep apnea, and other conditions that cause distress to patients and reduce their quality of life. Obesity also increases the risk of heart attack and death.

Quality of life after total vs distal gastrectomy with ...<https://pubmed.ncbi.nlm.nih.gov/28373774>

Results: The patients who underwent TGRY experienced the poorer QOL compared to DGRY in the 15 of 19 main outcome measures of PGSAS-45. Moreover, multiple regression analysis indicated that the type of gastrectomy, TGRY, most strongly and broadly impaired the postoperative QOL among six explanatory variables.

May 07, 2014 · Gastric cancer remains the second leading cause of cancer death in the world and is the most frequent malignancy in Japan, South America, and Eastern Europe [1, 2]. Long-term survivors after radical gastrectomy have been increasing as the result of better early detection and improved surgical techniques [3–5]. The better surgical outcome has led to greater interest in the quality of life (QOL ...
