Apr 21, 2017 · **Resurfacing** of the glenohumeral joint for patients with glenohumeral arthritis has gained popularity since the first introduction. We report the mid-term results of the Global C.A.P. **uncemented resurfacing** shoulder prosthesis (DePuy Synthes). From January 2007 to December 2009, 48 **humeral** cementless **resurfacing** prostheses in 46 patients were performed.

[Outcome and revision rate of uncemented glenohumeral ...](#)

<https://pubmed.ncbi.nlm.nih.gov/28432457>

Eleven patients (23%) had a revision operation. Conclusions: The most important findings of this study of the Global C.A.P. shoulder resurfacing arthroplasty were an increase of range of motion, a reduction of pain complaints, but a concerning high rate of revision after mid-term follow-up. Level of evidence: Therapeutic Level IV.
