

PEER-REVIEW REPORT

Name of journal: World Journal of Methodology

Manuscript NO: 62862

Title: Molecular diagnosis in cat allergy

Reviewer's code: 03852107

Position: Editorial Board

Academic degree: PhD

Professional title: Associate Professor

Reviewer's Country/Territory: China

Author's Country/Territory: Romania

Manuscript submission date: 2021-01-23

Reviewer chosen by: Jin-Lei Wang

Reviewer accepted review: 2021-02-07 01:58

Reviewer performed review: 2021-02-07 03:02

Review time: 1 Hour

Scientific quality	<input type="checkbox"/> Grade A: Excellent <input type="checkbox"/> Grade B: Very good <input checked="" type="checkbox"/> Grade C: Good <input type="checkbox"/> Grade D: Fair <input type="checkbox"/> Grade E: Do not publish
Language quality	<input type="checkbox"/> Grade A: Priority publishing <input checked="" type="checkbox"/> Grade B: Minor language polishing <input type="checkbox"/> Grade C: A great deal of language polishing <input type="checkbox"/> Grade D: Rejection
Conclusion	<input type="checkbox"/> Accept (High priority) <input type="checkbox"/> Accept (General priority) <input type="checkbox"/> Minor revision <input checked="" type="checkbox"/> Major revision <input type="checkbox"/> Rejection
Re-review	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Peer-reviewer statements	Peer-Review: <input checked="" type="checkbox"/> Anonymous <input type="checkbox"/> Onymous Conflicts-of-Interest: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

SPECIFIC COMMENTS TO AUTHORS

Although the review is interesting, but still contains some issues, belowing (1) All Fel d 1-8 should b introduced together, with a summary of molecular mechanisms and mapping. Finally, it explains which molecules are the best as commercial IgE immunoassays. (2) The introduction o f the Cat Niemann-Pick type C2 protein and Kallikrein allergens is too little, and i do not understand the author's intention to introduce the Cat Niemann-Pick type C2 protein and Kallikrein allergens. (3) Why can't IgA Fel d 5, IgM Fel d 6 and so on be available as allergen components in the current commercial IgE immunoassays? Please explain the reason and indicate whether it has potential as the commercial IgE immunoassays.
