

Reviewer 1 comments:

In order to help the reader better understand the treatment of HCV combined with HIV, the author should summarize the infection rate of HCV with or without HIV in Table, and compare the treatment effect of HCV treatment and HCV plus HIV.

Answer:

I summarize the infection rate of HCV with or without HIV, and compare the SVR of HCV treatment between HCV monoinfection and HCV/HIV coinfection in new Table 1 as your comments.

---

Reviewer 2 comments:

The manuscript is well written, discussing important subjects, doses and step-wise approach or algorithm should be provided for every situation.

Answer:

I summarize the HCV/HIV coinfection treatment algorithm as your recommendation in new Figure 1.
