[PDF] Global guidance for surgical care during the COVID-19 pandemic
https://bjssjournals.onlinelibrary.wiley.com/doi/epdf/10.1002/bjs.11646
To mount an effective response to the COVID-19 pandemic, hospitals should prepare detailed context-specific pandemic preparedness plans for surgical services, addressing the key domains identified here (Table1). Specific guidance should be updated continuously to reflect emerging evidence as the COVID-19 pandemic progresses.

Global guidance for surgical care during the COVID-19 pandemic
https://bjssjournals.onlinelibrary.wiley.com/doi/full/10.1002/bjs.11646
Apr 15, 2020 · Introduction. Guidance is urgently needed on how to deliver surgical services safely and effectively in the face of pressures placed by the COVID-19 pandemic 1-3.Surgical services need to balance supporting the whole hospital response and minimizing the risk of nosocomial spread of COVID-19 against continuing care for acute surgical conditions and managing urgent elective surgery.

The COVID-19 pandemic, as experienced in the surgical service of a district hospital in Spain

Covid-19, our experience

Abstract

COVID-19 pandemic Coronavirus disease (COVID-19), which is caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), was first identified in December 2019 in Wuhan, China, and has since spread rapidly, evolving into a full-blown pandemic.

We would like to report our experience after one year of this pandemic in the surgical service of a district hospital in Spain. There have been many changes (including new
