#### **SPECIFIC COMMENTS TO AUTHORS**

Reviewer The manuscript is interesting. Title is Acute Kidney Injury and Hepatorenal Syndrome in Cirrhosis, and abstract mentioned that this article reviews the current guidelines and recommendations of AKI in cirrhosis. However, it requires some answers to comments about the novelty of the references. # There are enough references in this review, a complete description of the evidence, detailed and appropriate integration, but some aspects seem to lack novelty. For example, see Table 4 The most well-known novel biomarkers being studied for AKI in cirrhosis. The references are from 64 to 89, but less than 5 in the last 5 years. It would be better if there were more references in the last 5 years.

### PEER-REVIEW REPORT

#### **SPECIFIC COMMENTS TO AUTHORS**

The authors have produced a timely and well written review of acute kidney injury associated with both chronic and acute liver disease. They have reviewed the current literature and produced a comprehensive review of the clinically relevant facts available.

This review will help clinicians with a more general practice to assess and manage patients with acute kidney injury associated with liver disease and in addition discriminate true HRS from other causes of AKI. The manuscript is well written and has few grammar or typographical errors. The manuscript is deserving of publication and will provide a useful addition to the published literature.

## RE-REVIEW REPORT OF REVISED MANUSCRIPT

**Name of journal:** World Journal of Gastroenterology

**Manuscript NO:** 62955
