

April 11, 2021

Dear Reviewers,

We are so pleased that our review is being considered for the *World Journal of Gastroenterology*.

We made the changes they asked us to. There are in total 63 references, with 18 references published in the last 3 years, 4 self-cited references.

We added the authors' information and "Author Contributions". Our figures were made with **biorender.com** program. We added our figures in a PowerPoint file and the table in a word file. If it was necessary to modify some aspects of the figures, I will send you the page to be able to do it.
