## Management of Patients with Confirmed 2019-nCoV | CDC

<https://www.cdc.gov/coronavirus/2019-ncov/hcp/...> ▾

Feb 11, 2020 · Many people with COVID-19 experience **gastrointestinal symptoms** such as nausea, vomiting or diarrhea, sometimes prior to having fever and lower respiratory tract signs and **symptoms**. (9) Loss of smell (anosmia) or taste (ageusia) has been commonly reported, in a third of patients in one study, especially among women and younger or middle-aged ....

## Organ-specific manifestations of COVID-19 infection

<https://pubmed.ncbi.nlm.nih.gov/32720223>

Although COVID-19 presents primarily as a lower **respiratory tract infection** transmitted via air droplets, increasing data suggest multiorgan involvement in patients that are infected. This systemic involvement is postulated to be mainly related to the **SARS-CoV-2 virus** binding on angiotensin-converting enzyme 2 (ACE2) receptors located on several different human cells.
