Treatment Options for Thrombocytopenia in Patients With ...

<https://journals.lww.com/jcge/Fulltext/2020/07000/...>

According to the American Association for the Study of **Liver** Diseases (AASLD), **cirrhosis** is a heterogeneous **disease** that cannot be studied or managed as a single entity. 4 As such, this advanced form of **liver disease** is most commonly the result of nonalcoholic fatty **liver disease**, chronic hepatitis C virus (HCV), and alcoholic **liver disease**.

Causes and Management of Non-cirrhotic Portal Hypertension

<https://pubmed.ncbi.nlm.nih.gov/32940785>

Recent findings: The management of NCPH consists in the treatment of associated diseases and of portal hypertension (PH). PH due to PSVD or PVT is managed similarly to PH due to cirrhosis. TIPS placement and **liver** transplantation are considerable options in patients with refractory variceal bleeding/ascites and with progressive liver failure.

[Treatment of hepatocellular carcinoma in the cirrhotic ...

<https://www.ncbi.nlm.nih.gov/pubmed/30109374>

Surgery of HCC in the non-cirrhotic liver with a curative intent is guided by the general principles of oncological liver surgery. DISCUSSION: Curative treatment options for HCC include **liver transplantation, partial liver resection** and local **ablative** procedures. Current developments in the area of organ donation and technical advances in minimally invasive liver surgery should be included ...
