

Siena, June 30<sup>th</sup> 2021,

To whom it may concern,

The Manuscript NO: 03883459 (**Microbiota and viral hepatitis: state of the art of a complex matter**) by **Edda Russo *et al.***, which is under consideration for publication in your journal, was re-read by **Savannah Devente, MSc.**

In 2014, Savannah Devente obtained her bachelor's degree of Applied Science in Biology and Medical Laboratory Research from the Hogeschool Leiden (Netherlands), after completing nine months of research abroad at AgResearch Palmerston North (New Zealand). She then completed her master's degree in 2016 in Biomedical Sciences at the Free University Amsterdam (Netherlands) after completing five months of research abroad at the University of Florence (Italy). From 2016-2017 she worked at the department of Medical Microbiology and Infection Control at the Amsterdam University Medical Center (UMC) (Netherlands).

Savannah Devente is currently taking part in a PhD program at the University of Siena (Italy) where she is involved in (managing) international collaborations. On a daily basis, she experiences the use of written and spoken English language, including regularly English proof-reading of scientific manuscripts.

The edit has achieved Grade A: priority publishing; no language polishing required after editing.

Please do not hesitate to contact her if any other addition information is required.

**S.R. Devente, MSc.**
