

Dear Reviewers', here point-by point response to your comments

Reviewer 1.

Thank you very much for the words of appreciation and for the suggestions. Concerning the comments:

1. As advised, in the influenza section, topic on weaker Abs production in patients treated with anti-TNF after vaccination was added
2. As advised, in the SARS-CoV-2 section, observation of worse outcomes in patients treated with steroids was reported
3. Considerations and observations about effects of corticosteroids use were added to the risk factors and conclusions sections.

Reviewer 2.

Thank you very much for the appreciation shown to our manuscript.

Reviewer 3.

Thank you very much for the words of appreciation and for the suggestions. Concerning the comments:

As advised, sections of the paper were better organized.

1. As required, general approach to infections section was structured based on symptomatic patterns. A table with a list of potential viral infections and diagnostic work up was added.
2. As required, in the hepatitis A section, information about clinical presentation was added
3. As required, core tip section was rewritten
4. Misspellings were corrected

Reviewer 4.

Thank you very much for the appreciation shown to our manuscript.

Regarding language issues in the manuscript some adjustments have been made to the vocabulary and syntax.
