[Role of AI in detection and management of colorectal ...](#)

<https://www.mayoclinic.org/medical-professionals/...> ▼

Feb. 14, 2020. **Artificial intelligence (AI)** is emerging as a tool with which **gastroenterologists** can improve colon polyp detection rates, characterization and management. This branch of computer science attempts to mimic the intelligence and behavior of human beings. A process called deep learning is integral to the development of **AI tools** in **gastroenterology**, especially in **imaging** technologies.
