4 October 2021,

Dear World Journal of Orthopaedics,

Our manuscript titled “**Rates of readmission and reoperation after operative management of midshaft clavicle fractures in adolescents**” is a database study using data obtained from the Healthcare Cost and Utilization Project (HCUP). Therefore, no IRB approval letter was required. This is also stated in our manuscript (ID: 63558).

Sincerely,

Ishaan Swarup, MD

Assistant Professor of Clinical Orthopaedic Surgery  
Associate Fellowship Director, Pediatric Orthopaedic Surgery  
University of California, San Francisco
