SPECIFIC COMMENTS TO AUTHORS

I hope ,it would be slightly better to rephrase Liver test as liver function Test parameters or Liver enzymes or the most suitable one

SPECIFIC COMMENTS TO AUTHORS

This manuscript is interesting and easy to read, although lack of novelty. The strengths of this study is in the large number and the diversity of patient population. For the finding of a cholestatic pattern of liver injury are at the highest risk for poor outcomes, the authors should elaborate the proposed pathomechanisms beyond this finding, particularly those related with the COVID-19 disease.
