Anaphylaxis - CHEST[https://journal.chestnet.org/article/S0012-3692\(17\)31332-6/fulltext](https://journal.chestnet.org/article/S0012-3692(17)31332-6/fulltext)

Aug 08, 2017 · Anaphylaxis is a systemic, life-threatening disorder triggered by mediators released by mast cells and basophils activated via allergic (IgE-mediated) or nonallergic (non-IgE-mediated) mechanisms. It is a rapidly evolving, multisystem process involving the integumentary, pulmonary, gastrointestinal, and cardiovascular systems. Anaphylaxis and angioedema are serious disorders that ...
