## Liver Transplantation in Acute-on-Chronic Liver Failure ...

<https://pubmed.ncbi.nlm.nih.gov/30345287>

Background: **Acute**-on-chronic **liver failure** (ACLF) is a complex **disease** with deteriorating **liver** and kidney function and associated organ **failure** in patients with chronic **liver disease**. Methods: This is a concise overview for bedside and algorithmic decision making in patients with ACLF based on the most recent literature. Results: Diagnosis and dynamics of ACLF can be easily monitored with the ...

### Liver transplantation in acute on chronic liver failure ...

<https://pubmed.ncbi.nlm.nih.gov/26159163>

Acute on chronic liver failure is an entity distinct from acute liver failure and acute decompensation of chronic liver disease. Despite best medical therapy, it is associated with high short-term mortality due to infection and organ failure. Liver transplantation is a potentially curative treatment ...

**Liver Failure**

Medical Condition

Nausea, swollen abdomen, yellowing of skin and eyeball

A condition in which the liver is unable to perform its normal metabolic functions. This causes jaundice, abdominal pain, swelling in legs, dark urine color, nausea and vomiting.

- 📊 Rare (Fewer than 200,000 cases per year in US)
- 🧪 Often requires lab test or imaging
- 🩺 Treatments can help manage condition, no known cure
- 🕒 Can last several months or years

Liver failure could be due to conditions such as severe jaundice, hepatitis, cirrhosis, alcohol abuse, etc. Yellowing of the skin, pain in upper right abdomen are the major symptoms. It requires immediate medical attention and is treated on the basis of causing factor using medication or by a liver transplant.

**Symptoms**

At the early stage one can experience following symptoms:

- Nausea
