POEMS Syndrome

Medical condition

POEMS syndrome is an extremely rare multisystem disorder. POEMS is an acronym that stands for (P)olyneuropathy, disease affecting many nerves, (O)rganomegaly, abnormal enlargement of an organ, (E)ndocrinopathy, disease affecting certain hormone-producing glands that help to regulate sexual function, and certain metabolic functions, (M)onoclonal gammopathy or M protein, and (S)kin abnormalities.

WebMD

Symptoms

POEMS stands for these signs and symptoms:

- Polyneuropathy: Numbness, tingling and weakness in your legs - and over time, maybe in your hands - and difficulty breathing.
- Organomegaly: Enlarged spleen, liver or lymph nodes.
- Endocrinopathy: Abnormal...

Causes

The cause of POEMS syndrome is not well understood. POEMS syndrome is a parapneoplastic disorder, which means that the signs and symptoms of the syndrome appear as a manifestation of the plasma cell disorder that the patient has (most patients are
