## **SPECIFIC COMMENTS TO AUTHORS**

This case series concern awake craniotomy for auditory brainstem implant in neurofibromatosis type 2 patients. This a very interesting theme. However, recent years have seen many new papers of this field, and this paper adds no important new data to our knowledge and is not acceptable for publication in the present form. Major points a) Please clarify the inclusion and exclusion criteria for this treatment. b) In my opinion, the present “case presentation “ form should be replaced by the traditional one (separate presentation of each case, or “Materials and Methods” and “Results”) c) Discussion: Please compare the present study and many representative papers and emphasize the strength of this study. Minor points a) English: To be revised. b) Keywords: delete “case report”. c) References: Too few. Please add many papers published in 2020 and 2021. d) Abbreviate the journal’s name (refs.8-10) e) Figure1: Please indicate the lesion by arrows. f) Table 3: Please footnote it ((-):no event).

## RE-REVIEW REPORT OF REVISED MANUSCRIPT
