

PEER-REVIEW REPORT

Name of journal: *World Journal of Radiology*

Manuscript NO: 63891

Title: Prevalence of Hypercoagulable States in Stented Thrombotic Iliac Vein Compression Syndrome with Comparison of Re-intervention and Anticoagulation Regimens

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 05130917

Position: Peer Reviewer

Academic degree: MSc, PhD

Professional title: Professor

Reviewer's Country/Territory: India

Author's Country/Territory: United States

Manuscript submission date: 2021-02-10

Reviewer chosen by: Ze-Mao Gong

Reviewer accepted review: 2021-07-29 08:54

Reviewer performed review: 2021-07-29 10:18

Review time: 1 Hour

SPECIFIC COMMENTS TO AUTHORS

The authors have made a retrospective study of patient records related to the iliac vein compression. The sample size (65) is a bit too small for this type of study. Other than this, the study has been conducted methodically and the data has been compiled and analysed properly. The article can be accepted for publication.
