**Adenoma of the ampulla of Vater: a case report**

<https://pubmed.ncbi.nlm.nih.gov/24965285>

In this study, we propose the application of transduodenal local excision of the ampulla of Vater especially in recognized cases of nonmalignant adenomas. Case presentation: In this case report we analyze the case of a 78-year-old Greek man who revealed symptoms such as icterus, abdominal pain without constipation and bloody stools. A physical examination showed painless swelling of the ...

### Robotic transduodenal ampullectomy: Case report and ...

<https://europepmc.org/article/PMC/PMC7952669> ▾

While traditionally performed via open surgery, it has been attempted via laparoscopic approach and more recently robotic approach. We present a case of a 63-year-old man who underwent a robotic transduodenal ampullectomy for ampullary adenoma with high grade dysplasia, and review the literature surrounding robotic transduodenal ampullectomy.

### Robotic transduodenal excision of ampullary tumour - Wong ...

<https://hbsn.amegroups.com/article/view/12954/17222> ▾

Limited cases of laparoscopic transduodenal excision of ampullary tumours were reported in the literature, probably due to the technical difficulties in performing the operation, especially during the reconstruction of the pancreaticobiliary ducts with the laparoscopic approach.
