**Intracranial hemorrhage after carotid artery stenting in ...**<https://www.ncbi.nlm.nih.gov/pubmed/30572539>

RATIONAL: Intracranial hemorrhage (ICH) after carotid artery stenting (CAS) is a rare but fatal complication, and it primarily occurs in the corresponding vascular distribution area. Herein, a case of ICH after CAS in both anterior and posterior circulation has been described. PATIENT CONCERNS: A 62-year-old female was referred to the hospital for left-side limb weakness and right nasal hemianopia for ...

**Transient Cerebral Vasospasm After Carotid Artery Stenting ...**<https://pubmed.ncbi.nlm.nih.gov/31837494>

Background: Cerebral embolism after carotid artery stenting (CAS) is a well-known complication, but cerebral ischemia owing to cerebral vasospasm after CAS is rare and has seldom been reported. We describe a patient with transient ischemic complications owing to reversible cerebral vasospasm of the middle cerebral artery after CAS.

**Abstract**

BACKGROUND

Ileum hemorrhagic infarction after carotid artery stenting (CAS) is a fatal complication. The prognosis of ileum hemorrhagic infarction after CAS is very poor if not treated in a timely manner. We describe a rare case of ileum hemorrhagic infarction due to acute embolism of the mesenteric artery after CAS.
