Mental Health of Parents of Special Needs Children in ...
<https://pubmed.ncbi.nlm.nih.gov/33353165>
We assessed the mental health of parents (N = 1450, M age = 40.76) of special needs children during the COVID-19 pandemic. We conducted an online survey comprising items on demographic data; two self-designed questionnaires (children's behavioral problems/psychological demand of parents during COVID-19); and four standardized questionnaires, including the General Health Questionnaire ...
