#### **SPECIFIC COMMENTS TO AUTHORS**

The Frontiers manuscript “Biomarkers in autoimmune pancreatitis and IgG4-related disease” is overall well-written and an important work. My minor suggestions/comments are as follows: -The sentence “AIP and IgG4-RD are newly established disease entities proposed by Japanese physicians[2-4].” in the conclusion section seems out of place and of questionable value; please consider deleting/heavily revising. -I would strongly suggest adding an algorithm (e.g. for the diagnostic workup of possible/suspected AIP) as a clinically useful figure. This is particularly important in those who have normal or only minimally elevated serum IgG4 levels (can pose a diagnostic conundrum).

#### **SPECIFIC COMMENTS TO AUTHORS**

Dear authors, First of all, thank you for submitting your manuscript to the World Journal of Gastroenterology. Congratulations on writing an interesting, comprehensive and fluent article. IgG4-RD is a newly recognised disease, information about its diagnostic markers is lacking. The manuscript contains the newest data about existing biomarkers and pathogenesis. It would be clearer and more memorable if you summarized the existing biomarkers in the table and provide some illustrative components while discussing pathogenesis.

## RE-REVIEW REPORT OF REVISED MANUSCRIPT

**Name of journal:** World Journal of Gastroenterology

**https://**[www.wjgnet.com](http://www.wjgnet.com)

applicable/salient for clinicians and researchers. No major concerns. Some of the phrasing may be revised for attention to detail, objectivity, and accuracy. For instance, "Autoimmune pancreatitis (AIP) and immunoglobulin G4-related disease (IgG4-RD) are new disease entities characterized by enhanced IgG4 antibody responses."; are these really "new disease entities", or are they "recently recognized"?
