International recognition of the Ilizarov techniques for bone reconstruction. An update of current practice and research (dedicated to the 100th birthday of Prof. G. A. Ilizarov)

International recognition of the Ilizarov techniques for bone reconstruction

### Abstract

The Ilizarov method is one of the current methods used in bone reconstruction. It originated in the middle of the past century and comprises a number of bone reconstruction techniques executed with a ring external fixator developed by G.A. Ilizarov. Its main merits are viable new bone formation through distraction osteogenesis, high union rates and functional use of the limb throughout the course of
