#### **SPECIFIC COMMENTS TO AUTHORS**

This review manuscript of “DPP-4 inhibitor-induced Autoimmune diseases: Current Evidence” is a very well written paper. They fully describe the importance of DPP-4 in the immune system. They also elaborate the existing literature on the association of DPP-4 inhibitors and some autoimmune diseases, and these are the messages that many readers want to know. I have some suggestions for them, hoping that this can improve their manuscript. 1. Can you put in the patient number in the population column of Table 2, to help readers more realize the cited study? 2. Some typographical errors may need to correct, such as on page 8 line 3, page 11 line 2, page 12 line 4, page 14 line 1.
