Global health disparities in vulnerable populations of psychiatric patients during the COVID-19 pandemic

Diaz A *et al.* Global Health Disparities

Ailyn Diaz, Ritika Baweja, Jessica K Bonatakis, Raman Baweja

Abstract

The coronavirus disease 2019 pandemic affects psychiatric patients disproportionately compared to the general population. In this narrative review, we examine the impact of the pandemic on significant global health disparities affecting vulnerable populations of psychiatric patients: people of diverse ethnic background and color, children with disabilities, sexual gender minorities, pregnant women, mature adults, and those patients living in urban and rural communities. The identified disparities cause
