- 1) The first 3 paragraphs are general information and have been shortened.
- 2) These paragraphs were written in a more original form.
- 3) Table 1 has been changed
- 4) Can't say exactly
- 5) We specified our own application
- 6) The role of gastroscopy in GER is indisputable. In this case, the general recommendation is Roux-en-y bypass. There is not enough literature information about routine pH-meter and manometry in these patients.

We have added the native proofreading confirmation paper.

Unnecessary sentences have been revised.

Table 1 has been changed.

Since the subject of the article is gastroscopy in bariatric surgery, we did not specify the negative or positive aspects of surgery.

References fixed.
