#### **SPECIFIC COMMENTS TO AUTHORS**

The review was a comprehensive explanation of plexiform fibromyxoma for pathologist. The differential diagnoses of PF from other malignant lesions based on histologic and molecular are important for its determine the follow treatment. The quality of the review is high. No fruther revsion is needed. There are still two questions for the authors: How can we diagnosis PF accurately preoperative? Does endoscopic ultraound play a role ? Due to the benign potential of PF, surgicl resection may not be necessary. Does PPIs take effect to treat ulcer caused by PF?
