

Complete remission with immunotherapy: Case report of a ...

<https://www.ncbi.nlm.nih.gov/pubmed/32123665>

Feb 12, 2020 · Bladder cancer is the sixth most common malignancy in the United States. Cisplatin combination regimens are first line therapy for patients with metastatic urothelial bladder cancer who are eligible candidates and no treatments have shown to improve outcome compared to chemotherapy for the past 20 years.

Complete response to trastuzumab and chemotherapy in ...

<https://pubmed.ncbi.nlm.nih.gov/32110671>

A phase II trial has explored the combination of cytotoxic chemotherapy with the anti-HER-2 monoclonal antibody trastuzumab in selected patients with metastatic bladder cancer, but it failed. Case summary: Here, we report a case of recurrent urothelial bladder carcinoma (UBC) in a patient who has undergone three operations, and further ...

Successful response to camrelizumab in metastatic bladder cancer: A case report

Successful response to camrelizumab in mBC

Abstract

BACKGROUND

This is the first report to use camrelizumab with chemotherapy for advanced bladder cancer patients with positive PD-L1 expression and high TMB. More effective predictors of bladder cancer immunotherapy have yet to be explored, and the combination of multiple factors may be more predictive than a single factor.

Successful treatment of advanced alveolar soft part ...

<https://pubmed.ncbi.nlm.nih.gov/33545800>

Radiotherapy was administered in addition to camrelizumab combined with apatinib to treat the brain metastases. The patient achieved partial remission (46%) after 3 months of treatment and did not present any severe side effects. This is the first reported case of the successful treatment of advanced ASPS with camrelizumab combined with apatinib.
