

Dear editor,

Thank you for your suggestions. The following changes were made.

1. I have added table 2, which includes characteristics about subtypes of gastric neuroendocrine tumors, including pathogenesis and prognosis.
2. A short paragraph was added after type 4 g-NEN, evaluating a new class of g-NEN, in patients with long term PPI use and without atrophic gastritis.
3. A new conclusion section was added.

Yours Sincerely

Assoc Prof Hüseyin Köseoğlu
