How I treat LGL leukemia

https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3062292

Mar 10, 2011 The authors use low-dose methotrexate initially for T-LGL leukemia patients with neutropenia and/or RA. We recommend either methotrexate or oral cyclophosphamide as initial therapy for anemia. If treatment is not successful, patients are switched to either the other agent or cyclosporine.
