

We would like to thank the reviewers for critically analysing the manuscript. We have tried to incorporate the suggestions to the best of our ability. Please see editions made.

Reviewer 1 (Reviewer's code 05448308)	
Comments	Response
As the intrahepatic cholangiocarcinomas and primary lymphomas are more common than liposarcomas, I would suggest that you use the cholangiocarcinoma to take place the liposarcoma, or just add the cholangiocarcinoma.	A paragraph about intrahepatic cholangiocarcinoma appearances on Gadoxetic acid-enhanced MRI liver has been added

The signed Conflict-of-Interest Disclosure Form and Copyright License Agreement are missing.	Both forms uploaded
(1) The key word "COVID-19" is missing in the title. Please add it	This has been reviewed and key word not added as deemed not relevant to the manuscript given there is no discussion about COVID-19 within the article
(2) The language classification is Grade C. Please visit the following website for the professional English language editing companies we recommend: https://www.wjgnet.com/bpg/gerinfo/240	The manuscript has been reviewed and edited by the authors who are Native English speakers. In addition, the reviewer's grade we received was indeed Grade A, rather than Grade C.
(3) The title is no more than 18 words	The title is currently at 18 words
(4) The "Author Contributions" section is missing. Please provide the author contributions	Author contributions section has been added
(5) The "Article Highlights" section is missing. Please add the "Article Highlights" section at the end of the main text	As per section (3) <i>Requirements for Article Highlights: If your manuscript is an original study (basic study or clinical study), meta-analysis, or systemic review, the "Article Highlights" section should be provided. Detailed writing requirements for the "Article Highlights" can be found in the Guidelines and Requirements for Manuscript Revision.</i> Article Highlights section was not added as is not required for a Minireview
Abbreviations	
Title: Please spell out any abbreviation in the title. Abbreviations are not permitted.	Title changed to: Indeterminate liver lesions on Gadoxetic acid-enhanced magnetic resonance imaging of the liver: case-based radiologic-pathologic review
Main Text: Abbreviations must be defined upon first appearance in the Main Text.	Corrected the instances where abbreviations were not defined upon first appearance in the Main Text
Figures: Please verify the abbreviations used in figures and define them (separated by semicolons)	Ensured all abbreviations used in figures are defined at the end of the figures

at the end of the figure legend or table; for example, BMI: Body mass index; CT: Computed tomography.
