

December 13, 2013

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 6490.doc).

**Title: SPINAL CORD INVOLVEMENT IN PATIENTS WITH CIRRHOSIS**

**Author:** Raffaele Nardone, Yvonne Höller, Monica Storti, Piergiorgio Lochner, Frediano Tezzon,  
Stefan Golaszewski, Francesco Brigo, Eugen Trinka

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 6490

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

We provide language certificate by professional English language editing.

2 Revision has been made according to the suggestions of the reviewer.

(1) We include a table with differential diagnosis and a table with diagnostic criteria.  
Language editing has been performed (see invoice American Journal Experts).

(2) In the section "Pathophysiology" the authors added some more information, also regarding the distinction of this entity from hepatic encephalopathy. Unfortunately, experimental studies in animals that can help for the distinction of the two clinical entities are still lacking.

(3) We include a table with differential diagnosis and another with recommended diagnostic evaluation.

(4) We believe that such a review may be of interest also for gastroenterologists.  
The Medline-search strategy has been clarified.

3 References and typesetting were corrected.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Raffaele Nardone, MD, PhD
