SPECIFIC COMMENTS TO AUTHORS

Dear author: It has been a pleasure to read this review. The content is interesting and attractive. Just I have suggested on the manuscript to add a pair of facts in the table 1 (regarding recent structural data of D3 and D2 dopamine receptors) and probably a pair of details about the great contribution of Dr. Philip Sheeman to the dopamine receptors discovery is desirable, as they were appreciated by readers. Also, I edited a pair of typo mistakes (G-Pprotein and D2receptor).
