Genomics in Clinical Practice: Expect the Unexpected

<https://www.medscape.com/viewarticle/966282>

May 18, 2020 · Studies have shown that factors that predict BRCA1/BRCA2 mutations do not predict mutations in other breast/ovarian cancer susceptibility genes when these genes are analyzed as a single group. [5]

Genomics in Clinical Practice: Expect the Unexpected

https://www.medscape.com/viewarticle/866282

May 18, 2020 - Studies have shown that factors that predict BRCA1/BRCA2 mutations do not predict mutations in other breast/ovarian cancer susceptibility genes ...

Dealing with the unexpected: consumer responses to direct ...

https://peetj.com/articles/8 -

Feb 12, 2013 - Background. Inherited BRCA gene mutations convey a high risk for breast and ovarian cancer, but current guidelines limit BRCA mutation testing to women with early-onset cancer and relatives of mutation-positive cases. Benefits and risks of providing this information directly to consumers are unknown. Methods. To assess and quantify emotional and behavioral reactions of ...

A Positive Oestrogen Receptor Status and Breast Cancer Survival in Nordic BRCA2 Mutation Carriers Laufey Tryggvadóttir, MSc., Professor, University of Iceland / Icelandic Cancer Registry. 11:10 - 11:30 ... Genetic counselling - How to expect the unexpected?

Genetic Testing - Medical Clinical Policy Bulletins | Aetna

www.aetna.com/cpb/medical/data/100_199/0140.html

Oncogenic activation of signaling pathways downstream of the EGFR, such as mutation of KRAS, BRAF, or PIK3CA oncogenes, or inactivation of the PTEN tumor suppressor gene is central to the progression of colorectal cancer. Tumor KRAS mutations, which may be present in 35 % to 45 % of patients with colorectal cancer, have emerged as an important predictive marker of resistance to panitumumab or ...

High-density array-CGH with targeted NGS unmask multiple ...

https://www.pnas.org/content/113/47/13432 -

Nov 22, 2016 - We found that gene mutations/deletions are frequent in mesothelioma and occur through a variety of DNA alterations. We identified genes implicated in malignant mesothelioma: SETD2, SMARCC1, PBRM1. Previous next-generation studies (NGS) underestimated the frequency of genetic alterations in malignant mesothelioma because NGS mainly identifies nucleotide level mutations. Our ...

Werner syndrome (WRN) gene variants and their association ...

https://www.sciencedirect.com/science/article/pii/S1568163717302507

Jan 01, 2018 - A previous German study had revealed a significant association of the WRN SNP 1367R with familial breast cancer risk in families that did not carry either a BRCA1 or BRCA2 germ line mutation. The 1367R allele was more frequent among breast cancer cases than controls (Wittenberger et al., 2006).

CKIT mutation - The Quiet Advocate

https://thequietadvocate.com/tag/ckit-mutation -

Mar 06, 2021 - Susan's drug - also a targeted treatment - has been approved by the FDA for use in BRCA-related metastatic breast cancer. About one in 500 women in the US have a BRCA mutation, and a reasonable proportion of these women will develop breast cancer as a result. There is a sizeable market for Susan's medication.

nivolumab - The Quiet Advocate

https://thequietadvocate.com/tag/nivolumab -

Nov 01, 2020 - Susan's drug - also a targeted treatment - has been approved by the FDA for use in BRCA-related metastatic breast cancer. About one in 500 women in the US have a BRCA mutation, and a reasonable proportion of these women will develop breast cancer as a result. There is a sizeable market for Susan's medication.
