#### **SPECIFIC COMMENTS TO AUTHORS**

There are some typographic errors. There are very long sentences. To improve readability, consider breaking this into multiple sentences. The authors are encouraged to proof-read thoroughly the text before resubmission. English must be excellent. In order for clarity to be the guiding principle, the authors should use active voice instead of passive voice. The sentences should be short and contain one point. The paragraphs should contain one theme, few sentences and generally as few words as possible. All studies are put into perspective and placed the review at a coherent position considering the bibliography. The manuscript is very well written and provides a comprehensive overview of the topic.
