There were no significant difference in the expression levels of BCL-2 and cleaved CASPASE-3 between 11.1 MBq and 37 MBq group ($P > 0.05$), but the expression levels of ...

Vascular Endothelial Growth Factor in the Management of ...

<https://www.researchgate.net/publication/26700345...>

13 Shim et al reported that overexpression of VEGF related to poor prognosis following TACE in patients with HCC. 14 Thus, if HIF-1 α was effectively inhibited, the efficacy of TACE and/or TAE in ...

<https://onlinelibrary.wiley.com/doi/10.1111/1751-2980.12954>

It is difficult to identify the disease in the early stage, and most of the existing treatment methods are unsatisfactory. PFKFB3 is up-regulated in certain cancers, but its role in HCC is still not clear. Thus, w...

Hypoxia-inducible factor 1 and cancer pathogenesis

<https://www.researchgate.net/publication/5343790...>

Hypoxia-inducible factor 1 (HIF-1) is a transcriptional activator that mediates adaptive responses to hypoxia. HIF-1 activity is increased in the majority of human cancers as a result of genetic ...
