#### **SPECIFIC COMMENTS TO AUTHORS**

The manuscript (number: 65082) entitled “Ectopic opening of the common bile duct into the duodenal bulb with recurrent choledocholithiasis: A case report” has been reviewed.

1. Title is reflect the main subject. 2. Abstract section is sufficient. 3. Keywords are reflect the focus. 4. Background is adequately. 5. Case presentation is well designated. 6. Although the discussion section is sufficient, it should be shortened by focusing on the purpose. Much literature information is included like review article. 7. References is appropriate. 8. Manuscript is well organized. The article is generally well organized and can contribute to the literature. However, some minor corrections are required.

#### **SPECIFIC COMMENTS TO AUTHORS**

This report is an interesting description of a rare ectopic opening of the common bile duct, worth of publishing. English style can be improved. However, while the description of the case is detailed and precise, the discussion is really too exhaustive, especially considering that it is a case report. Discussion should attain mainly practical problems and difficulties during management and not be a review of the literature. References are appropriate and updated. Figure 3 may be avoided, as does not add anything to the case.
