#### **SPECIFIC COMMENTS TO AUTHORS**

Although this case is rare, the association between neonatal biliary atresia and preduodenal portal vein has not been clarified in this paper. You need to consider these relationships in detail in the text.

#### **SPECIFIC COMMENTS TO AUTHORS**

The case report is very interesting, I have the following comments: 1. All abbreviations need revision; please remove all abbreviations from the abstract as possible also, explain any abbreviations. 2. Please summarize the surgical data and remove the unnecessary details. 3. The English of the manuscript needs revision. There are many grammatical and syntax errors in the manuscript e.g., lift the jejunum from the umbilical incision about 15cm away from the the ligament of Traitz.
