#### **SPECIFIC COMMENTS TO AUTHORS**

This paper reviews the clinical symptoms of Cardiovascular Autonomic Neuropathy in the early, middle and late stages of diabetes mellitus, and the relationship between the incidence and mortality of diabetes mellitus with heart disease. The authors introduce the traditional diagnostic method of Cardiovascular Autonomic Neuropathy and cardiac <sup>123</sup>I radiography. The advantages and disadvantages of the two methods are compared in terms of economics and accuracy. This paper has scientific and clinical value for the diagnosis and early intervention of heart complications in the prevention and treatment of diabetic patients. It is suggested to carefully check the accuracy of individual words before publishing.
