SPECIFIC COMMENTS TO AUTHORS

The authors present a thorough review on hepatopancreatoduodenectomy for management of gallbladder cancer and extrahepatic cholangiocarcinoma. I believe with some adjustments, this review may be acceptable for publication. First, in the abstract change "being liver failure and pancreatic" to "while liver failure and ..." Second, please insert citations immediately after mentioning an author (example: in historical perspective, add citation after mentioning Kuno et al". Do this all throughout the manuscript. Third, a section on limitations of the study is needed. Mentioning that the search was limited to English only articles and other possible limitations faced must be added. Fourth, adding a flow diagram on the selection process of included papers would be beneficial. Perhaps use the PRISMA flow diagram as a template. This would enrich the paper and search strategy. Mention all inclusion and exclusion criteria in the methodology section as well.
