SPECIFIC COMMENTS TO AUTHORS

This is a guideline that outlines how to screen, treat, and monitor ROP under pandemic situations caused by the Covid-19 virus. In this situation, it would be a good idea to think about writing once. Several modifications might be needed though. In the case of a solution in the text, such as alcohol or water, it would be good to clearly state the correct concentration and what kind of water it is. Check the spelling in “13. Between each patient, hands must be washed and Sterlium be used and allowed to dry before handling the patient”. Please refer to the most important tables, Tables 2 and 3. It would be good if you could attach a background reference to each of the reasons for this follow-up or treatment.
